AWARENESS LAB SME (ALARM)
INFORMATION SECURITY

Project duration: **01.10.2020 - 30.09.2023**

Who we are

The project Awareness Lab SME (ALARM) Information Security will establish an innovative general scenario geared to the experience of participants and designed to support and raise awareness in SMEs in Germany over a period of three years.

What we offer

- An ongoing process of awareness raising in information security, offered free of charge
- Free access to analogue and digital learning scenarios / simulations, incl. detailed instructions
- Free individual awareness testing
- Free low-threshold security analyses with concrete instructions
- Participation and involvement in a pioneering project with national reach
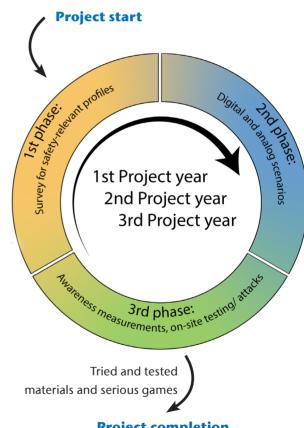

What we need from you

- An interest in and willingness to participate in online surveys and interviews
- Short-term, coordinated availability of staff to carry out learning scenarios, tests, and evaluations

What the process involves

- Anonymized polls conducted online and on-site
- Skill profiling based on specific areas of work activity
- Your feedback on how to improve the learning scenarios
- Awareness testing to measure learning achievement
- Practical recommendations to help employees help themselves

Applied research at the Technical University of Applied Science Wildau Awareness Lab (**ALARM**) Information security

- New ways for enhancing information security and encouraging SMEs to support themselves

Project start

1st phase: Survey for safety-relevant profiles

2nd phase: Digital and analog scenarios

3rd phase: Awareness measurements, on-site testing/ attacks

1st Project year
2nd Project year
3rd Project year

Tried and tested materials and serious games

Project completion
Enhanced awareness of information security, with long-term effect
